Previous screen readers provide blind WWW-users only with the textual contents of the web pages, but exclude the access to important information coded in the layout of web pages. The approach we introduce here shall overcome the layout barrier of webpages ...

Keywords: accessibility, accessible internet, auditory interaction objects, barrier free GUI, binaural perception, blind users, spatialized sounds, visually impaired users

Bibliometrics: Downloads (6 Weeks): 9, Downloads (12 Months): 60, Citation Count: 2

Many presence studies show the importance of display variables in determining presence. However, very little empirical evidence exists to support the notion of "the suspension of disbelief" or other psychological determinants of presence. We argue from ...
